

MISSION

We aim to create a harmony between the objects and furniture we design and the environments in which they live: offices, domestic areas and public spaces.

MA/U Studio respect the open space and its social identity –
We like the idea of furniture changing according to the purpose for which it is used and the way it communicates with its surroundings.

“Visualizing the constantly changing purpose of the furniture and objects that creates a space is what matters when creating furniture for the future”.

– Design Director Mikal Harrsen.
