

## PRODUCT INFORMATION

### R.I.G. MODULES (Rudimentary Interior Geometry)

Design Mikal Harrsen

*An ultra-flexible modular system with clean lines that helps organising storage spaces by drawing a geometric layout ideal for both domestic and professional spaces. The minimal modules blend in harmoniously attention to industrial, yet precious materials and rigorous design functionality.*

### R.I.G. TABLE (Rudimentary Interior Geometry)

Design Mikal Harrsen

*The natural evolution of the R.I.G. system, now with new configurations. The original design approach is applied to multifunctional desks and table that are surprisingly light and with a clear vocation for simplicity that suits any environment.*

### R.I.G. BENCH (Rudimentary Interior Geometry)

Design Mikal Harrsen & Adam Hall

*A versatile bench that complements the R.I.G. system modules, becoming a workstation and occasionally a low table, available in different sizes.*

### T.T.A. TABLE (Tribute to Albers)

design Mikal Harrsen

*A table built on simple elements inspired by the optical experiments of German painter Josef Albers. The thin geometrical structure, combined with tops available in different thicknesses, has an impressive graphic sign that will play the leading role in any living space.*

### N.E.T. TABLE (Never Ending Table)

Design Søren Ulrik Petersen

*Wood as a communication tool for this contemporary reinterpretation of the classic table on trestles. Available with top in Dinesen Douglas or other essences of extraordinary dimensions, N.E.T table is custom-made and basis for stories, opinions, creative workshops or taste of conviviality.*

### C.O.P. STORAGE SYSTEM (Creative Office Project)

Design Mikal Harrsen

*Three basic modules to draw a wall by alternating solids and voids. A highly customisable system of open cabinets that can be equipped with shelves and drawers, C.O.P. is designed to be efficient thanks to smart technical solutions, without sacrificing the pleasure of geometric decoration.*
