

R.I.G. BENCH

Solid wood

Rudimentary Interior Geometry

The R.I.G. Modules bench is designed from the idea of joining simple principles; optimized use of materials, enhanced functionality and a minimalist expression.

By using well known construction techniques, we have created a series of furniture with an absolute generic appearance, that would allow the structure and the materials to perform as the ultimate leading characteristics.

PRODUCT

Design: R.I.G. Bench
Type: Bench and side board

DESIGN

Designer: Mikal Harrsen & Adam hall
Year: 2015

MANUFACTURING

All components
produced in Italy and EU

MA / U
